

*No pathogen challenge / no mock arm in this dataset -- MV102 and MV32 never share a pre-stimulus starting point.
This measures non-isogenic background divergence between two bred lines, not an induced/hpi-style response.*

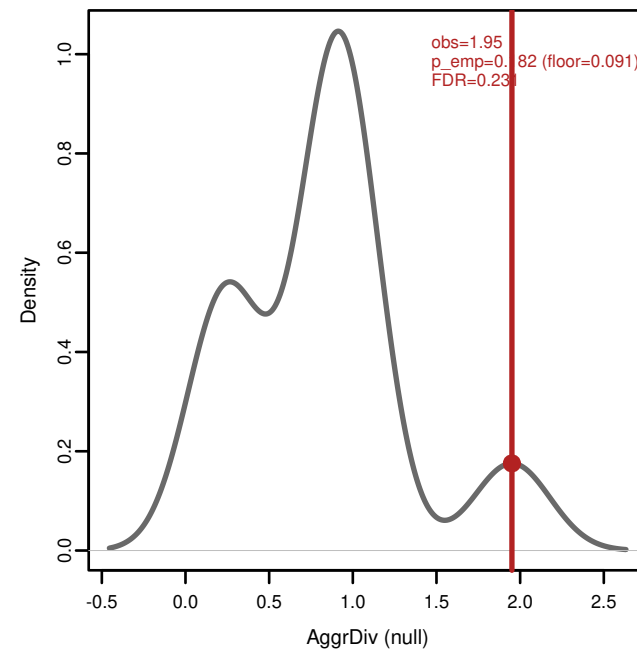

T0 (n=3 v 2, pool=5)

T1 (n=3 v 3, pool=6)

T4 (n=3 v 2, pool=5)

T6 (n=2 v 2, pool=4)
